# **Bedrock Mining Equipment** are an industry leader, with an extensive catalogue range and data base of QDS Attachments and Mining Equipment options to choose from.

Servicing Australia wide we offer comprehensive, high quality and cost-effective design and engineering services while also distributing and maintaining a wide variety of underground mining equipment. We pride ourselves on being a trusted partner to both large and small mining operators – with a focus on efficiency, safety and superior outcomes.

Our service team are on standby in Queensland and New South Wales to ensure any problems or situations that may arise onsite can be dealt with promptly and cost effectively.

## **Engineering**

Bedrock Mining Equipment are an industry leader in specialty hire, fabrication and equipment maintenance. We are strategically based in Mackay to offer comprehensive, high quality and cost-effective design and engineering services that include:

- Light to medium fabrication, refurbishment in all aspects of mild steel, stainless steel and aluminium
- Abrasive blast and protective coating facilities
- Drafting, design and engineering
- Manufacture and overhaul of OEM parts and components
- Project management and support

**We achieve competitive pricing and prompt service by offering a 'one-stop-shop' at our fit for purpose workshop. The integrated capabilities, together with highly skilled staff and extensive specialty equipment, allow Bedrock to produce the highest quality products at affordable prices.**

**We pride ourselves on supplying quality products that can be designed and certified for all your operational needs.**

## **Equipment Hire**

Bedrock Mining Equipment offer a large range of quality underground equipment for long or short-term hire. Being an OEM of our fleet allows us to design and manufacture the right equipment required for your project needs. All Bedrock hire equipment include all relevant plant safety files, along with site intro documentation to support while onsite.

**If the gear you need is not on hand, we have the ability to build and supply as required.**

## **Ventilation Products**

We supply a full range of VCD products to meet mine-specific requirements – VCD products can be customised for all solutions as per your mine site or project needs. All VCD consumable products are available as requested.

- Overcasts
- Vehicle doors
- Regulators
- Airlocks
- Coffin seals
- Man doors

**Our products comply with the highest safety standards – to keep you and your team safe.**

## **Parts and Consumables**

Bedrock Mining Equipment offer full support, through to store stock supply options for all parts and consumables that may be required. Our range of consumables is continually expanding, and includes:

- Mining consumables
- OEM and aftermarket parts
- VCD consumable products

**Our range of consumables to suit mining equipment for surface and underground mines throughout Australia is growing based on client requirements.**

**Bedrock Mining  
Equipment operate  
throughout Australia.  
We are here to answer  
your questions and  
provide any information  
you may need.**
